

BlockChain Copyright

The purpose of this project is to put all information about songs copyrights and roles of owners(payment percents) into the blockchain structure. using the blockchain infraestructure we can make smartcontrats with partner then artists can get information more exactly about profits and usages tracking.

Music Social Network

The main idea is to sell a plan of music to end users using blockchain and smart contract, all this in a new platform (like spotify) and so be able to have information about profits and statistics.

Automatic Search Engine

This procedure permit to check if a song is used illegally based on the data store in the blockchain.
